1. General information about the Plan

The IDEO+ CONSERVATIVE Plan (the "Plan") is a trust maintained by declaration of trust pursuant to the Civil Code of Quebec. It is governed by a trust agreement (the "Agreement") concluded on February 1st, 2022, between Kaleido Foundation (the "Foundation"), Eterna Trust Inc. and Kaleido Growth Inc. The latter acts as the investment fund manager of the IDEO+ CONSERVATIVE Plan promoted by the Foundation. The Plan's head office and principal place of business is located at 1035 Wilfrid-Pelletier Avenue, Suite 500, Quebec City (Quebec) G1W 0C5.

The IDEO+ CONSERVATIVE Plan is an individual scholarship plan. Under an individual scholarship plan, there is only one designated beneficiary at any given time and that beneficiary does not have to be related to the subscriber. In addition, there is no age limit for becoming a beneficiary of the scholarship plan. Subscribers can choose to make one-time contribution or monthly contributions. Beneficiaries may be eligible for several government grants. Contributions and grants are recorded and maintained at the depository. Contributions are returned to the subscriber or beneficiary and the income earned on these contributions and grants are used to make Education Assistance Payments if they meet the terms of the Income Tax Act (Canada).

The release of these financial statements was authorized by the Audit and Risk Management Committee on August 27, 2025.

2. Material accounting policy information

Statement of compliance

The interim condensed statements of financial position, the interim condensed statements of net and comprehensive income, the interim condensed statements of changes in net assets attributable to contracts, the interim condensed statements of cashflows and the accompanying interim condensed notes were prepared in accordance with IAS 34 Interim Financial Reporting.

These interim condensed financial statements should be read in conjunction with the financial statements for the year ended December 31, 2024. The significant accounting policies used in preparing these condensed interim financial statements are consistent with those found in the financial statements for the year ended December 31, 2024.

3. Significant accounting judgments, estimates and assumptions

When applying the Plan's accounting policies, as described in Note 2 of financial statements for the year ended December 31, 2024, management must make judgments as well as estimates and assumptions about the carrying amounts of assets and liabilities. The estimates and associated assumptions are based on historical experience and other factors considered relevant. Actual results may differ from these estimates.

The main sources of uncertainty regarding estimates and the main judgements made by management for the unaudited interim condensed financial statements are identical to those presented in the annual financial statements for the year ended December 31, 2024.

Management exercised judgment and made estimates and underlying assumptions regarding the QESI receivable.

4. Investments

	June 30, 2025	December 31, 2024
Short-term investments	18,364	28,934
Bonds	70,200	50,366
Equities	14,347	12,191
	102,911	91,491

5. Current assets and liabilities

The Plan expects to collect dividends receivable, interest receivable, CESG receivable and QESI receivable no later than 12 months following the closing date.

In addition, the Plan expects to settle amounts due to suppliers and other accounts payable within 12 months of the balance sheet date.

6. Accounts payable and other liabilities

	June 30, 2025	December 31, 2024
Amount noughle to Kalaida Crouth Inc	354	104
Amount payable to Kaleido Growth Inc.	334	104
Amount payable to the Kaleido Foundation	-	5
Accumulated income on grants for payment to a designated		
educational institution	3	2
Other	154	43
	511	154

7. Related party transactions

Kaleido Growth inc.

Kaleido Growth inc., a wholly owned subsidiary of the Foundation, is the distributor of the products promoted by the Foundation and serves as the Plan's distributor and investment fund manager.

Kaleido Foundation

The Foundation is the promoter of the IDEO+ CONSERVATIVE Plan. The Plan and the Foundation report to the same Board of Directors.

Administration fees	June 30, 2025	June 30, 2024
Kaleido Growth Inc.	921	635
	921	635

7. Related party transactions (continued)

Amount payable	June 30, 2025	December 31, 2024
Kaleido Growth Inc.	354	104
Kaleido Foundation	-	5
	354	109

8. Capital management

The capital of the Conservative Plan consists of the net assets attributable to subscribers and beneficiaries.

The Plan's principal is subject to daily variation as it is continually subject to contributions and terminations. The investment strategy aims to invest subscriber contributions, government grants and income in a diversified mix of investments in order to generate a reasonable and competitive long-term return, while assuming a lower level of risk.

This strategy involves adjusting the asset mix over the years, so as to reduce exposure to risk as the beneficiary approaches the age of eligible studies and thus promote the preservation of accumulated capital over time. In line with this investment horizon, the proportion of fixed-income securities increases, while that of variable-income securities decreases.

Capital management policies and procedures must comply with the provisions of the Securities Act (Quebec) and meet the conditions of section 146.1 (1) of the Income Tax Act (Canada). The Plan is not subject to any other external capital requirements

9. Financial instruments

Fair value

Establishing fair value

The fair value of cash, dividends receivable, interest receivable, CESG receivable, QESI receivable, accounts payable and other liabilities approximate their carrying value due to their short-term maturities.

The fair value of the net assets attributable to contracts corresponds to it's carrying value, given that it is the residual value allocated to contract holders and beneficiaries as at the reporting date.

Fair value measurements

The scholarship plans promoted by the Foundation qualify under IFRS as an investment entity as they hold and manage funds from investors (the Subscribers) with the objective of realizing returns in the form of capital gains and investment income. In addition, the scholarship plans evaluate and assess the performance of these investments on a fair value basis.

Fair value is defined as the price that would be received for the sale of an asset or paid for the transfer of a liability in an arm's length transaction between market participants at the measurement date, whether that price is directly observable or estimated using another valuation technique.

In estimating the fair value of an asset or liability, the Scholarship Plans consider the characteristics of the asset or liability if that is what market participants would do to price the asset or liability on the measurement date.

9. Financial instruments (continued)

Fair value (continued)

· Establishing fair value

Fair value is defined as the price that would be received for the sale of an asset or paid for the transfer of a liability in an arm's length transaction between market participants at the measurement date, whether that price is directly observable or estimated using another valuation technique. When estimating the fair value of an asset or liability, scholarship plans take into account the characteristics of the asset or liability in a manner consistent with what market participants would do to price the asset or liability at the measurement date.

The fair value of equity investments is based on closing prices. The fair value of bond investments is based on median closing prices.

For short-term investments and bonds, if quoted prices in active markets are not available, fair value is determined using current valuation methods, such as a model based on discounted expected cash flows or other similar techniques. These methods take into account current observable market data for financial instruments with a similar risk profile and comparable terms and conditions. Important inputs to these models include yield curves and credit risks.

Fair value hierarchy

For financial reporting purposes, fair value measurements are classified in accordance with a hierarchy (Levels 1, 2, or 3). This classification is based on the level at which fair value measurement inputs are observable as well as on the significance of a particular input to the fair value measurement in its entirety. The fair value hierarchy consists of the following levels:

- Level 1 Valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities (for example, prices observable on the TSX) and for which the entity can access at the measurement date.
- Level 2 Valuation based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., prices) or indirectly (i.e., derived from prices). For example, matrix pricing, yield curves and indices.
- Level 3 Valuation in which a significant portion of the inputs used for assets or liabilities are not based on observable market data (unobservable inputs). For example, private investment valuations by portfolio managers.

The hierarchy that applies when determining fair value requires the use of observable market inputs whenever such inputs exist. Fair values are classified in Level 1 when the security is traded on an active market and a quoted price is available. If a financial instrument classified in Level 1 ceases to trade in an active market, it is transferred to the next level (Level 2). If the valuation of its fair value requires significant use of unobservable market inputs, it is then classified in Level 3.

9. Financial instruments (continued)

Fair value (continued)

• Fair value hierarchy (continued)

The following tables present the financial instruments recorded at fair value in the statements of financial position, classified using the fair value hierarchy:

As at June 30, 2025	Level 1	Level 2	Level 3	Total
Short-term investments	-	18,364	-	18,364
Bonds	-	70,200	-	70,200
Equities	14,347	-	-	14,347
	14,347	88,564	-	102,911
As at December 31, 2024	Level 1	Level 2	Level 3	Total
Short-term investments	-	28,934	-	28,934
Bonds	-	50,366	-	50,366
Equities	12,191	-	-	12,191

Over the course of the periods ended ended June 30, 2025 and December 31, 2024, there was no significant transfer between Levels 1 and 2.

91.491

Risk management related to financial instruments

Due to the nature of its business activities, the Plan is exposed to a variety of financial risks arising from financial instruments, such as credit risk, liquidity risk and market risk (including price risk, currency risk and interest rate risk). The Plan's overall risk management program seeks to maximize the returns achieved without exposing subscriber investments to undue risks and to minimize potential adverse impacts on financial performance. The main risks stemming from financial instruments to which the Plan is exposed, and the main actions taken to manage those risks are as follows:

Credit risk

The Plan is exposed to credit risk, which is the possibility of incurring financial losses resulting from the inability of a company, an issuer or counterparty to meet its financial commitments to the Plan. The Plan's exposure to credit risk arises from its investments in debt securities. The Plan has established qualitative selection criteria for investments to limit this risk.

The Plan only selects securities of the Canadian government, provincial governments, municipalities, government guaranteed agencies or corporations that are considered investment grade or in securities issued by corporations provided that such securities have a minimum rating of BBB or equivalent as assigned by a designated rating agency.

Quantitative restrictions have also been established to reduce credit risk. Securities from all borrowers, except a government, are limited to 7.5% of the total fair value of the fixed-income securities entrusted to the portfolio manager.

9. Financial instruments (continued)

Risk management related to financial instruments(continued)

• Credit risk (continued)

The Plan's maximum exposure to credit risk is the carrying amount of the financial instruments presented in the statements of financial position.

As at June 30, 2025 and as at December 31, 2024, the Plan invested in fixed-income securities that are neither past due nor impaired and that had the following credit ratings:

	Percentage of to	Percentage of total debt securities*	
	June 30,	December 31,	
Credit rating	2025	2024	
	%	%	
AAA	2.4	1.9	
AA	53.7	51.1	
A	25.8	29.0	
BBB	18.1	18.0	

^{*}Excludes short-term investments. Unclassified securities are included in the BBB category.

Liquidity risk

Liquidity risk pertains to the Plan's ability to meet its commitments in terms of financial liabilities and therefore, its capacity to carry out payments as required. The Plan is exposed to daily refunds to subscribers, who are entitled to request the refund of their savings at any time.

This risk is significantly reduced by the fact that the majority of Subscribers' savings are invested in fixed income securities that trade in liquid markets and this proportion increases as the contract nears maturity. The Plan carefully manages its cash flow on a daily basis and ensures that it maintains a level of cash flow to meet its liquidity needs.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk includes three types of risk: currency risk, interest rate risk and price risk. Changes in certain financial market parameters affect the Plan's statement of financial position and comprehensive income.

The Plan takes these risks into account when determining its overall asset allocation. Specifically, the Plan mitigates the effects of these risks by diversifying its investment portfolio across several financial markets (money, bond and equity markets), different products with varying risk profiles (equity and fixed income), as well as across industry sectors (government, municipal, energy, materials, communications, utilities, finance, consumer products, consumer services, industrial and technology).

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Plan engages in transactions denominated in foreign currencies and is therefore exposed to currency risk when selling and purchasing investments in U.S. currency and when the Plan has U.S. currency in its cash balance.

As at June 30, 2025, the Plan had \$0.6 in US currency (\$0.8 as at December 31, 2024) representing \$0.8 in cash (\$1.1 as at December 31, 2024). The Plan also had \$9.9M in U.S. currency shares (\$4.7M as at December 31, 2024) representing \$14.9M in investments (\$6.7M as at December 31, 2024).

9. Financial instruments (continued)

Risk management related to financial instruments (continued)

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Changes in interest rates have a direct impact on the value of the fixed maturity securities in the investment portfolio. This risk is mitigated by a range of maturities for the active portion of the bond portfolio and the development of a target duration in line with the economic outlook for the passive portion of the bond portfolio.

The maturity distribution of the bonds is adjusted regularly based on anticipated interest rate movements, in accordance with the maturity schedules set forth in the Plan's investment policy. The target duration is established based on an analysis of the economic environment, outlook and risk in relation to the nature of the Plan.

As at June 30, 2025 a 100-basis-point change in market interest rates, assuming a parallel shift in the yield curve and all other variables remaining constant, would cause the fair value of bonds held in the Plan's investment portfolio, net income, comprehensive income, and net assets attributable to contracts to change by approximately \$3.4M (\$2,5M as at December 31, 2024). In practice, actual results may differ materially from this analysis.

Investments that present interest rate risk are as follows:

	June 30,	December 31,
	2025	2024
	%	%
Maturing in less than one year	20.7	36.5
Maturing in one to five years	29.3	23.0
Maturing after five years	50.0	40.5

Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual instrument or its issuer, or by factors affecting all similar financial instruments traded in the market. Stock market volatility primarily affects the value of the Plan's equity holdings. It should be noted that this exposure is spread over various sectors of activity and in predominantly large-cap Canadian and American securities, which reduces this risk.

However, based on the evolving profile investment policy, it involves a low to moderate investment risk depending on the age of the beneficiary, since it provides for a significant proportion of variable income securities, which gradually decreases as the beneficiary ages. This proportion of variable-income securities decreases over time and is surpassed at the end of the plan by the proportion invested in fixed-income securities, which are less volatile.

The IDEO+ CONSERVATIVE Plan invests in fixed income securities, Canadian equities and U.S. equities, generally on a direct basis, although it may also invest through mutual funds or ETFs. The Plan also invests in foreign equities, real estate and infrastructure through mutual funds or ETFs.

A 10% change in the stock market index, with all other variables remaining constant, would create a change of approximately \$1.3M as at June 30, 2025 (\$1.0M as at December 31, 2024) in the fair value of the Plan's equity holdings, net income, comprehensive income and net assets attributable to contracts. In practice, actual results may differ materially from this analysis. The sensitivity analysis on the fair value of the bonds is described in the "Interest rate risk" section.

9. Financial instruments (continued)

Risk management related to financial instruments (continued)

Concentration risk

Concentration risk arises from having positions concentrated within a same category, whether that category is geographical location, product type, market sector or type of counterparty.

The following table summarizes the Plan's concentration risk in relation to the total carrying amount of equity investments:

Market sectors	June 30, 2025	December 31, 2024
	%	%
Energy	3.4	1.4
Materials	2.4	1.2
Communication Services	2.2	10.9
Financials	21.9	24.5
Consumer Staples	14.6	7.3
Consumer Discretionary	6.1	12.4
Health	7.8	7.8
Industrials	16.8	12.1

Offsetting

The following table presents the financial instruments that have been offset in the Plan's financial statements:

Canada Education Savings Grant (CESG) receivable	June 30, 2025	December 31, 2024
Canada Education Savings Grant (CESG) receivable Canada Education Savings Grant (CESG) refundable	476 (21)	1,793 (23)
	455	1,770

The Plan has no other financial instrument subject to an enforceable master netting agreement or similar agreement.

The Plan does not hold assets that can be used as a guarantee for the CESG receivable.
