## COMMENTS ON THE ECONOMIC MARKET

In 2024, the Bank of Canada cut its key rate five times, bringing it down to 3.25% at the end of the year. On the stock markets, 2024 was marked by solid performances: the U.S. market, represented by the S&P 500 index, posted an annual return of 36.3% in Canadian dollars, while the S&P/TSX index gained 21.6% over the same period. In the bond sector, the FTSE Canada Universe Bond Index closed the year with an annual return of 4.2%.

Shown are the returns for the plan as a whole (see [prospectus](#)). Please note that the return will be different for each beneficiary, since this is an investment strategy with an evolving profile that automatically adapts to the child's age.

9. ELI LILLY & CO	1.19%
10. META PLATFORMS	1.12%

**Total percentage of top 10 investments:** 39.22%

## INVESTMENT GOALS

The core investment goals of the IDEO+ Responsible Plan are to invest assets, in accordance with an investment strategy with an evolving profile, in such a way as to generate a positive impact on two themes linked to sustainable development: (i) climate change and (ii) children's well-being and education. The IDEO+ Responsible Plan invests in securities that have a strong positive alignment with these core investment goals. The IDEO+ Responsible Plan also aims to invest subscriber contributions and government subsidies in a diversified mix of investments to generate a reasonable and competitive long-term return, while assuming a low to moderate level of risk. There is no guarantee that contributions will be fully refunded to the policyholder. However, the profile-based investment strategy automatically adjusts the asset allocation to reduce exposure to risk as the beneficiary approaches the age of eligible studies, thereby helping to preserve accumulated capital over time.

This investment is made by means of a prospectus. The prospectus contains important detailed information about the securities being offered. Copies of the prospectus are available from Kaleido Growth Inc. or at [www.kaleido.ca/en/](http://www.kaleido.ca/en/). Investors are advised to read the prospectus before making any investment decisions. \*Past plan performance is not necessarily indicative of future performance. \*\*In addition, the 2022 return is not calculated over a full year, given the plan creation date.

## Additional information and definitions

### **BONDS:**

A bond is a financial instrument issued by a company, a government or a public or private entity, representing a contractual debt. It gives the investor (the bondholder) the right to receive periodic payments (called “coupons”) until the bond matures, when the principal amount of the debt is repaid. Note that several bonds may share the same name or issuer, but differ in characteristics such as life, interest rates, issue price and repayment terms. Bonds, sometimes called “fixed income”, are generally considered to be more conservative investments.

### **SHARES:**

Shares are a form of ownership issued by a listed company. The holder of a share becomes a shareholder and has certain rights, such as the right to vote at the company’s general meetings and the right to profits, which may be paid out in the form of dividends. The value of shares fluctuates mainly according to the company’s market performance.

### **FOREIGN EQUITIES:**

These are foreign shares issued by developed countries. Foreign equities are issued by a company or corporation based in a country other than Canada or the United States.

### **EXCHANGE-TRADED FUNDS (ETFs):**

An ETF is an investment fund that is traded on the stock exchange. Index ETFs are investment instruments designed to replicate the performance of a stock market, such as the Toronto Stock Exchange. They are traded like equities and offer investors diversification and flexibility.

### **ISHARES:**

iShares is a range of exchange-traded funds managed by BlackRock, one of the world’s leading asset management companies. iShares ETFs cover a wide range of asset classes, including equities, bonds, commodities and other asset classes.

### **ANNUALIZED RETURN:**

Annualized return is the rate of return on an investment on an annual basis. It allows you to compare the performance of various investments over an equivalent period, regardless of their actual duration. To calculate the annualized return, periodic returns (e.g., monthly or quarterly returns) are taken into account and converted into an equivalent annual rate.

### **RETURN PER CALENDAR YEAR:**

The calendar-year return is the rate of return on an investment over one calendar year, i.e., from January 1 to December 31 of the year in question.

### **EXPENSES PAID BY THE PLAN:**

The fees paid by the Plan include:

- administration fees;
- portfolio management fees;
- trustee fees;
- custodian fees;
- compensation of independent committee members;
- the Plan’s operating expenses, which Kaleido Growth Inc. does not deduct from administration fees
