March 31, 2024

COMMENTS ON THE ECONOMIC MARKET

The positive market trend persists for the first quarter of 2024. Stock markets posted a 13.46% return for the S&P 500 index representing U.S. equities in Canadian dollars, and a 6.62% quarterly return for the S&P/TSX representing Canadian equities. However, the FTSE Canada Universe Bond Index posted a quarterly performance of -1.22%, as the market cooled on the prospect of the interest rate cuts so eagerly awaited by investors being postponed until the second half of 2024.

Shown are the returns for the plan as a whole (see [prospectus](#)). Please note that the return will be different for each beneficiary, since this is an investment strategy with an evolving profile that automatically adapts to the child's age.

9. IVANHOE CAMBRIDGE II INC.	2,7%
10. FÉDÉRATION DES CAISSES	2,4%

Total percentage of top 10 investments: 30.3%

INVESTMENT GOALS

The core investment goals of the IDEO+ Adaptive Plan are to invest subscriber contributions and government grants, in accordance with an evolving profile investment strategy, in a diversified mix of investments so as to generate a reasonable and competitive long-term return, while assuming a low to moderate level of risk. There is no guarantee that contributions will be fully refunded to the policyholder. However, the profile-based investment strategy automatically adjusts the asset allocation to reduce exposure to risk as the beneficiary approaches the age of eligible studies, thereby helping to preserve accumulated capital over time.

This investment is made by means of a prospectus. The prospectus contains important detailed information about the securities being offered. Copies of the prospectus are available from Kaleido Growth Inc. or at www.kaleido.ca/en/. Investors are advised to read the prospectus before making any investment decisions. *Past plan performance is not necessarily indicative of future performance. **In addition, the 2022 return is not calculated over a full year, given the plan creation date.

Appendix

Additional information and definitions

The logo for Kaleido, featuring the word "KALEIDO" in a bold, sans-serif font. The letters "K", "A", "L", "E", "I", and "D" are in a light blue color, while the letter "O" is in a darker blue. The logo is set against a background of stylized, overlapping mountain peaks in shades of blue.

BONDS:

A bond is a financial instrument issued by a company, a government or a public or private entity, representing a contractual debt. It gives the investor (the bondholder) the right to receive periodic payments (called “coupons”) until the bond matures, when the principal amount of the debt is repaid. Note that several bonds may share the same name or issuer, but differ in characteristics such as life, interest rates, issue price and repayment terms. Bonds, sometimes called “fixed income”, are generally considered to be more conservative investments.

SHARES:

Shares are a form of ownership issued by a listed company. The holder of a share becomes a shareholder and has certain rights, such as the right to vote at the company’s general meetings and the right to profits, which may be paid out in the form of dividends. The value of shares fluctuates mainly according to the company’s market performance.

FOREIGN EQUITIES:

These are foreign shares issued by developed countries. Foreign equities are issued by a company or corporation based in a country other than Canada or the United States.

EXCHANGE-TRADED FUNDS (ETFs):

An ETF is an investment fund that is traded on the stock exchange. Index ETFs are investment instruments designed to replicate the performance of a stock market, such as the Toronto Stock Exchange. They are traded like equities and offer investors diversification and flexibility.

ISHARES:

iShares is a range of exchange-traded funds managed by BlackRock, one of the world’s leading asset management companies. iShares ETFs cover a wide range of asset classes, including equities, bonds, commodities and other asset classes.

ANNUALIZED RETURN:

Annualized return is the rate of return on an investment on an annual basis. It allows you to compare the performance of various investments over an equivalent period, regardless of their actual duration. To calculate the annualized return, periodic returns (e.g., monthly or quarterly returns) are taken into account and converted into an equivalent annual rate.

RETURN PER CALENDAR YEAR:

The calendar-year return is the rate of return on an investment over one calendar year, i.e., from January 1 to December 31 of the year in question.

EXPENSES PAID BY THE PLAN:

The fees paid by the Plan include:

- administration fees;
- portfolio management fees;
- trustee fees;
- custodian fees;
- compensation of independent committee members;
- the Plan’s operating expenses, which Kaleido Growth Inc. does not deduct from administration fees
